

NGTC-1212 Digital Signal Processor

The NGTC-1212 is a Dante™ enabled digital signal processor with flexible I/O for the NEXGENTEC AUDIO distribution solution.

The NGTC-1212 is capable of simultaneously transmitting and receiving up to 64 channels of Dante™ audio (64 x 64) and has a completely flexible DSP design platform.

The NGTC-1212 can be easily interfaced with 3rd party control systems via the network. It can also be used with the NGTC-SDM, the software defined Dante™ matrix and monitoring device to deliver a virtually unlimited audio matrix system.

The nexgentec DSP super modules enable efficient design and deployment of the NGTC audio network system, featuring the highest levels of functionality and performance.
